

ALUFLEXPACK AG

short presentation of Aluflexpack Group

January 2020

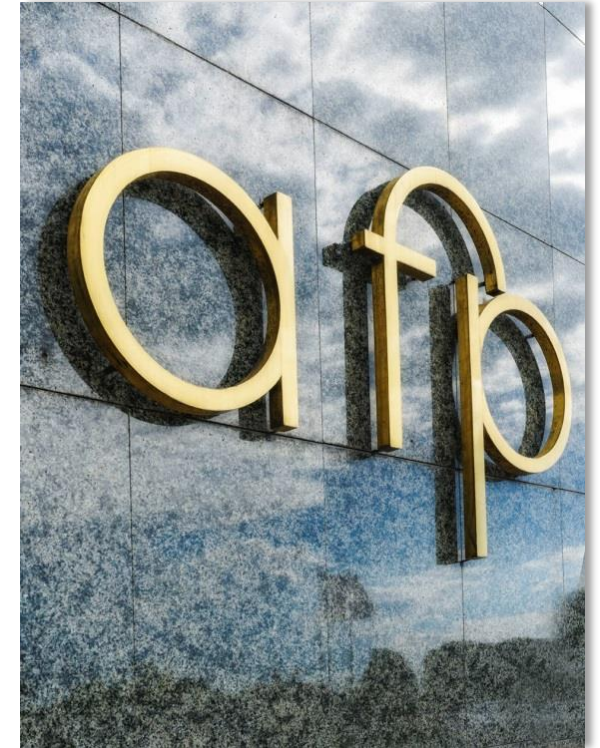

ALUFLEXPACK AG (Aluflexpack Group)

The Aluflexpack Group – international manufacturer of state-of-the-art flexible packaging for over 35 years!

The Aluflexpack Group is an independent and competitive group successfully supplying bespoke packaging to leading European manufacturers and global brands.

Since November 2012 Aluflexpack Group is a member of Montana Tech Components AG Group which is aiming at strengthening and further utilising its aluminium expertise and on its way to become one of the leading European players in the packaging industry.

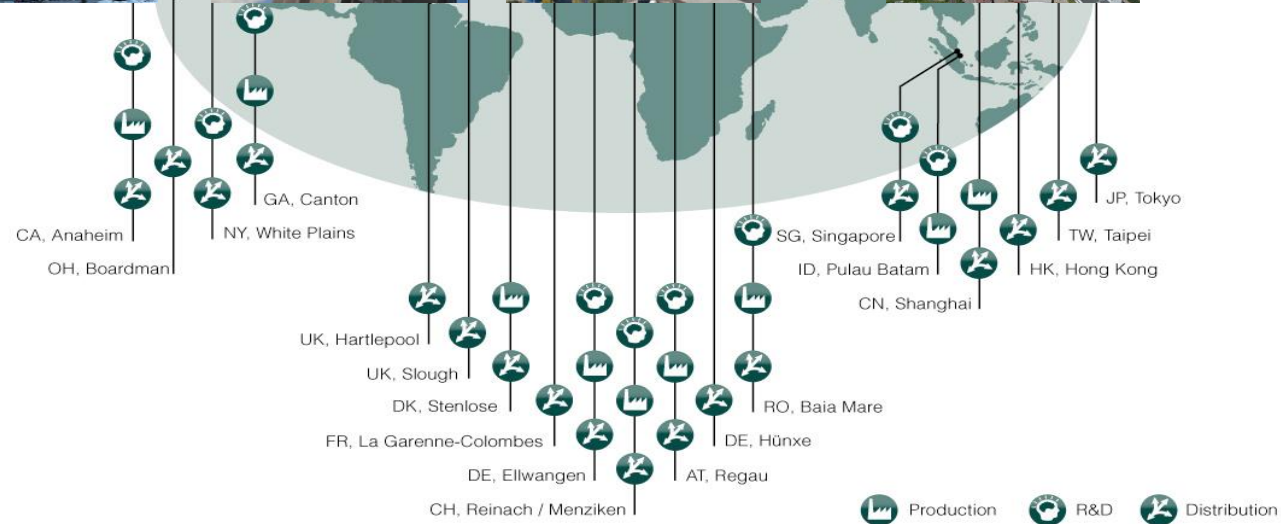

Since June 28th 2019 Aluflexpack Group successfully started with trading of new shares on the SIX Swiss Exchange, which confirms our commitment to fairness, transparency and sustainability and assures continuous development.

Aluflexpack on the SIX Swiss Exchange

As a part of the IPO process, Group has issued new shares and thereby ensured Company's capital increase while the Montana Tech Components Group (MTC) will stay majority shareholder and owner and assure continuity and stability in the strategy and development.

The Company will use the proceeds for investments aiming at increase of efficiency and existing production capacities as well as internationalization of its manufacturing footprint.

Value chain

SERVICES

CONVERTING

PRINTING

FINISHING

QUALITY

From an **idea** to the final product: we provide not only materials research, comprehensive product development, design services and pre-press work, but also efficient and appropriate business models to assure agility and the best support for day-to-day operations.

The **depth of our value chain** assures excellent quality of the final product: we lacquer, extrude and laminate functional layers on the base material.

Our **state-of-the-art** printing machines allow excellent print in roto, flexo and digital on aluminium, plastics and paper substrates. In addition, we provide numerous design and security options and effects.

We deliver **final products in different formats**: lids, reels, containers, bags, pouches, sachets, etc.

Our laboratories, sophisticated processing, quality control and assurance equipment, and also our stringent procedures ensure the **highest possible quality** and stability, and the reliability of our suppliers.

www.aluflexpack.com

The AFP Group has over 35 years of experience in converting native aluminium and plastic foils to high-quality final products: we laminate, lacquer, extrude, print, slit, emboss, punch and form aluminium and plastics to sophisticated flexible packaging.

Production plants and logistics hub

Aluflexpack Novi Drniš

Specialized in rotogravure printing, lacquering, laminating and coextrusion – production of semifinished and final products for selected industries :

Aluflexpack Novi Umag

Specialized in flexible packaging – rotogravure printing and laminating, wax coating and laminating, and pouch forming; production of final products for selected industries:

Aluflexpack Novi Zadar

Aluminium converting using UV-flexo and conventional flexo print and lid pinching; production of final products for selected industries:

Aluflexpack Polska

Logistics hub for all product types and industries:

Arimpeks Turkey

**NEW
MEMBER
SINCE 2018!**

Production of flexible packaging, converting aluminium and plastic materials using rotogravure, flexo and digital printing; production of final products for selected industries:

Eliopack France

Specialized in flexible packaging – converting aluminium and plastic materials using rotogravure, UV-flexo and conventional printing and laminating; production of final products for selected industries:

Omial Novi Omiš

Specialized in sterilized foils – lamination, lacquering, oiling and alu-container forming; production of final products for selected industries:

Process Point Service

Specialized in alu container forming - deepdrawing and punching; production of final products for selected industries:
