

A close-up, high-angle photograph of industrial machinery, likely a manufacturing process for aluminium packaging. The image shows several yellow, ribbed, oval-shaped components (possibly lids or pouches) being processed by a series of metal guides and rollers. The lighting is dramatic, highlighting the metallic textures and the bright yellow of the components.

# Reliability and experience

## Over 30 years of market presence

The Aluflexpack group is a reliable and competitive group of companies, whose core business is the development and production of outstanding and bespoke flexible packaging tailored fully according to customer's needs and demands. The Aluflexpack group successfully supplies leading European manufacturers and global brands from its plants for more than 30 years.

1. Aluflexpack Novi Zadar - Croatia
2. Aluflexpack Novi Umag - Croatia
3. Aluflexpack Polska - Poland
4. Eliopack - France
5. Omial Novi Omiš - Croatia
6. Process Point Service - Liechtenstein
7. TOF Drniš - Croatia

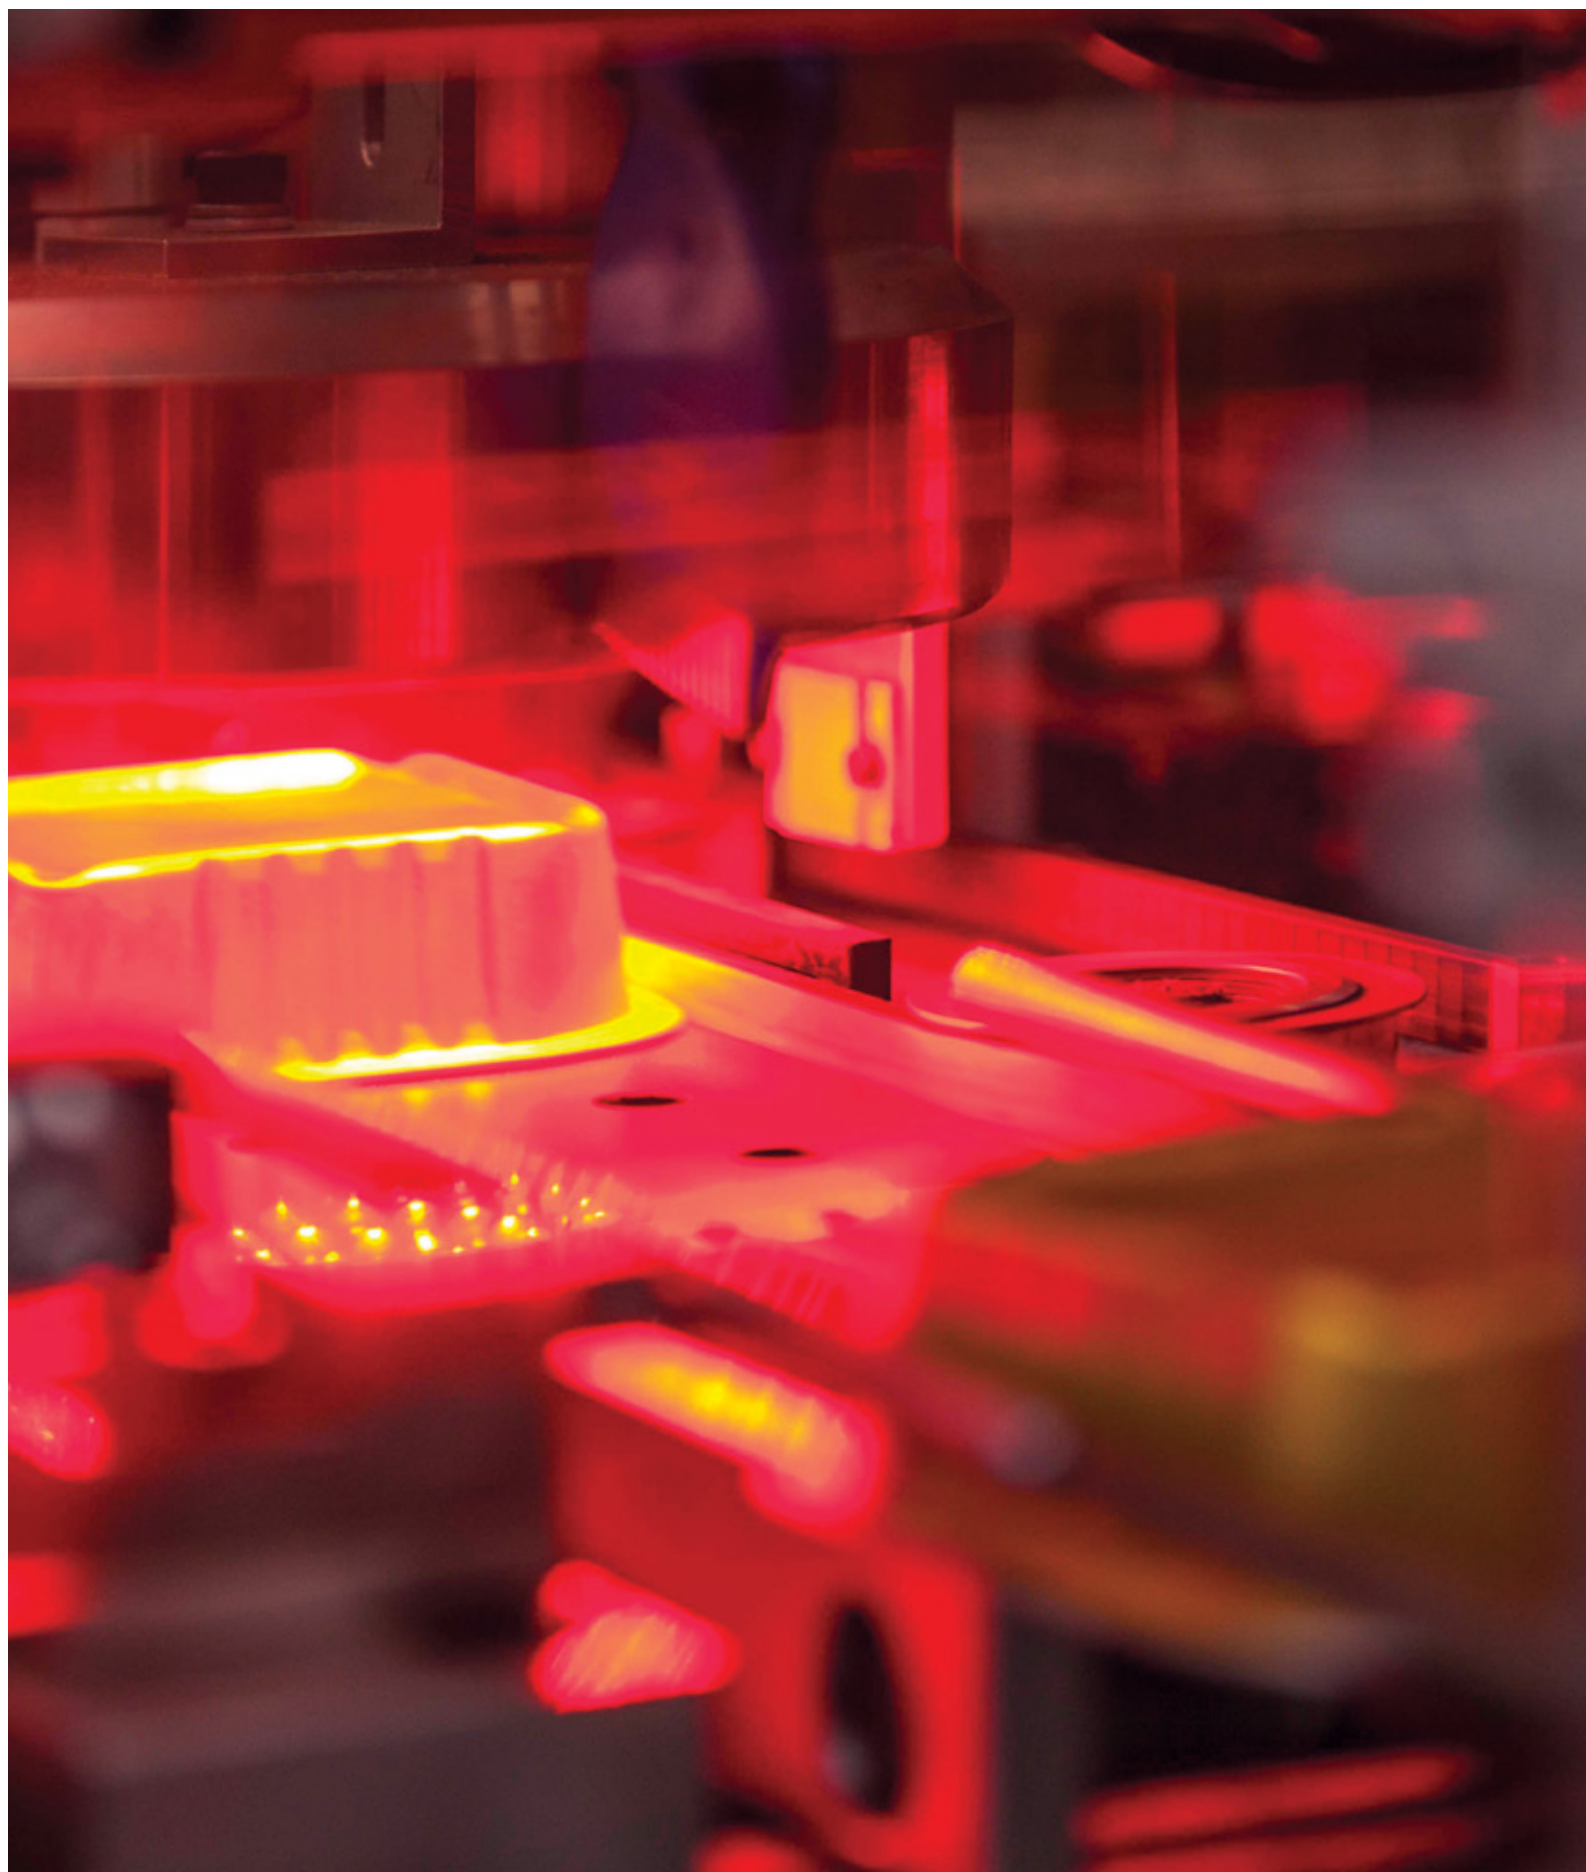

The Aluflexpack group is mainly oriented towards western European market where it continuously develops its product range as well as whole company business into one of the leading manufacturers in its production area, with the constant support of customers and suppliers.

The Aluflexpack group is aiming towards achieving the state-of-the-art product and service quality in its areas of expertise: group continuously develops innovative and ecologically oriented packaging solutions and it is fully aware of its obligations towards customers, partners, shareholders, employees and the environment. Personal commitment and active role of employees in company development are key factors of Aluflexpack group success.

# Quality and state-of-the-art technology

## Aluminium containers, lids and pouches

The Aluflexpack group offers aluminium containers, lids and pouches for Human Food and Pet Food industries in various dimensions and thickness, lacquered and/or printed.

Production and laboratories of Aluflexpack group are equipped with the best and most modern machinery and devices. Quality control department closely monitors production using clearly predefined measuring points and process control, ensuring continuous control which includes raw material quality control, semi-finished products, business process quality, as well as the finished goods quality control. The Aluflexpack group offers unique benefits to its customers considering that aluminium containers, lids and pouches are produced in a completely integrated process starting with raw material up to the final conversion, which guarantees short delivery terms, development of new products and the highest level of quality.

Aluminium is very rewarding and preferred material in Human Food and Pet Food industry,

extremely resistant and with excellent barrier properties: protecting the product from external influences like air, light, pollutants, microorganisms and spoilage; being convenient material for sterilization at the same time.

In human food products it is very important to stress that aluminium doesn't affect or influence the changes in composition of ingredients and also doesn't change the product taste, so it can be used for conservation of food for a longer period. Due to its lightness and flexibility it is very pliable to designing and forming into most demanding shapes. With all this, it is easily recyclable, which fulfills high ecological standards.

Highest production, hygiene and process standards using state-of-the-art machines placed in excellent conditions are applied in Aluflexpack group plants, which is confirmed by constant certifications of plants and business processes, performed by the most demanding and leading Western European institutions.

# Retortable pouches

## New product group

### 1. Materials

Pouch structure can be customized depending on product and customer wishes, from a basic laminated structure to a multi-layer barrier material to ensure best possible product protection.

### 2. Shapes

We can offer extensive variety of shapes customized depending on your customer needs, products or brand...from round edges suitable for easier usage and handling to special shapes customized to fulfill special product features and customer requirements. Simultaneously, the nature of the brand and product are most memorably highlighted.

### 3. Bottom types

Relative to the needs and products packed in pouches, we offer possibilities of producing different types of bottoms more suitable for volume and quantity of products packed, or for better stability and presentation on the shelves when displaying products at the point of sale.

### 4. Dimension range

Specific product type requires certain standard or packaging size and with our dimensions ranging from small and standard sizes up to extra large size pouches, you will surely be able to fulfill all market demands.

### 5. Colours

State-of-the-art machines in our plants are capable of printing up to 11 colours.

### 6. Printing possibilities

High quality degree enabled by specialized and sophisticated machines, able to convert the most demanding designs and graphical solutions into elegant and attractive printing with breathtaking preciseness, eyecatching to your potential customers.

### 7. Opening possibilities

Pouches are designed in a way to enable customers quick and easy opening of the products with addition of e.g. tear notches using special manufacturing technology and materials that are suitable for easier tear.

### 8. Hanging possibilities

These features enable not only optimum positioning and presentation on retail shelving, but also facilitate its reliable storage. These pouches therefore represent an extremely practical and, simultaneously, cost-effective packaging solution suitable for use with broad spectrum of products.

### Additional features

All additional features can be considered on request according to customer wishes and needs.
